## FASwin available for general release

April 14, 2009

FAS's newest version of FASwin software is now available for general release. FAS is the only system in the floral industry that allows its users to take advantage of a traditional text interface *and* a graphical Windows interface *all on the same system*. This feature allows a shop's employees to run the traditional software on serial "dumb" terminals and PCs while simultaneously running FASwin on Windows-based PCs attached to the FAS server with high-speed Ethernet connections. Data entered in one mode (traditional or FASwin) can be automatically processed and displayed in the alternate mode. Below is the invoice entry screen in FASwin. All of the order information can be viewed on a single screen, and order information can be entered in any sequence.

Orders are entered in FASwin very quickly using a true graphical interface developed in Microsoft's Visual BASIC and .Net framework. FASwin users can also process reports, gift cards, floral network messages (through FASnet, Mercury, and Dove), customer statements, and the daily close-out procedure with the click of a mouse. Invoices, delivery confirmations, and statements can be emailed directly from your PC workstation to your customers. You can spell-check a card message or order message with the click of a mouse.

Below is the cash register screen in FASwin. All functions—sales, disbursements, receipts on account, gift cards, etc.—can be accessed by clicking on the appropriate tab. Sales categories are selected by clicking on or by touching buttons on the screen, rather than by entering numeric product codes. Entering POS transactions has never been easier.

A PC equipped with an optional **touch-screen** monitor allows you to operate FASwin by simply pressing the desired option on the screen itself.

Although FASwin is entirely new software—not an update to existing software—the software is being provided at no charge to FAS users who have been on FAS’s software update maintenance programs

continuously for a period of at least one year and to new customers who have purchased FAS systems within the last year. Additionally, in order to receive the software free of charge, a FAS user’s account must be current. Shops that are not on FAS’s software support programs can purchase the new software, along with other related FAS updates.

For additional information about FASwin, please contact FAS’s support staff at (800) 830-6160, option #1. Thanks.
